ABOUT ME

Final-Year undergraduate Software Engineer with 1.5 years of experience in .NET development and quality assurance. Completed an internship as a Technical Consultant, gaining practical exposure to system customization, and implementation. Recognized for being adaptable, quick to learn, and dedicated to delivering high-quality software solutions that enhance system performance and business efficiency. Actively seeking an opportunity to apply technical expertise and grow as a Software Engineer within a growth-oriented organization.

EDUCATION

Bachelor of Science (Hons) – Software Engineering

National School of Business Management
2021 - 2025

G.C.E Advance Level - Physical Science

Sujatha Vidyalaya - Matara
2020 - 2023

SOFT SKILLS

Problem Solving

Team Work

Time Management

Leadership

PROGRAMMING LANGUAGES

C# Java Python

EXPERTISE

.NET | Spring Boot | OOP | React | Flutter | MySQL | BQL | ERP | REST | JSON | Postman | LRCN | Deep Learning | MediaPipe | OpenCV | SDLC | Git | IntelliJ IDEA | VS Code

EXPERIENCE

Associate Technical Consultant - Acumatica

Enterprise Analytics (Pvt) Ltd l Nugegoda *2024 – 2025*

- As a C# .NET Developer, developed and customized Acumatica ERP features, including screens, workflows, and reports to streamline business operations.
- Supported Go-Live and Post-Go-Live by deploying ERP customizations, and dashboards that enhance efficiency and user engagement.
- Contributed across all stages of the project lifecycle, ensuring seamless implementation, stable performance, and a better user experience.

PROJECTS

Ceyline Holdings (Pvt) Ltd

- Successfully developed the first-ever MT940 data provider in Acumatica using C#/.NET, improving bank statement import reliability.
- Successfully deployed 10+ standardized reports.

Dial A Tow Group

- Handled the entire technical scope of the project, streamlining operations and maintaining reliable system performance.
- Automated invoice and payment workflows through import scenarios, improving reporting accuracy and operational tracking.

Midaya Ceramic Company (Pvt) Ltd

- Independently managed all support cases on time, ensuring 99% system reliability through proactive monitoring and quick issue resolution.

Midaya Packaging Industries (Pvt) Ltd

- Delivered ERP data validations and reports, ensuring 100% alignment with customer requirements.

Anunine Holdings (Pvt) Ltd

- Designed and implemented ERP customizations to optimize core business operations.
- Maintained 10+ analytical reports while automating reporting workflows.

Access Engineering PLC

- Improved system performance and business insight by executing key customizations, optimized GIs, and impactful analytical reports.

Undergraduate Projects

MotionMate – Final Year Project

- Achieved high real-time accuracy by developing MotionMate, a live motion tracking system for physiotherapy exercises using a hybrid LRCN (CNN + LSTM) model.
- Integrated Flask, TensorFlow, and OpenCV for live video analysis, sequential frame processing, and real-time pose correction.
- Built an interactive web interface with HTML, CSS, and JavaScript to provide instant visual feedback and enhance user engagement.

Braille Desktop Application

- Built a C#/.NET desktop application empowering visually impaired users to create tactile drawings and convert text to Braille, enhancing user accessibility.
