PROFESSIONAL EXPERIENCE

Associate Technical Consultant - Acumatica

Enterprise Analytics (Pvt) Ltd l Nugegoda — March 2024 – Nov 2025

- As a C# .NET Developer, developed and customized Acumatica ERP features, including screens, workflows, and reports to streamline business operations.
- Supported Go-Live and Post-Go-Live by deploying ERP customizations, and dashboards that enhance efficiency and user engagement.
- Contributed across all stages of the project lifecycle, ensuring seamless implementation, stable performance, and a better user experience.

PROJECTS

Industry Projects

Ceyline Holdings (Pvt) Ltd

- Successfully engineered the first MT940 (.txt) data provider in Acumatica using C#/.NET, improving bank statement import reliability and financial data accuracy.
- Deployed standardized reports and customizations, including workflows and GIs.

Dial A Tow Group

- Handled the entire technical scope of the project, ensuring accurate and consistent transactional values across multiple screens.
- Integrated external customer site data into Acumatica using Import Scenarios, automating data imports and significantly reducing manual intervention.

Midaya Ceramic Company (Pvt) Ltd

- Independently managed all support cases on time, ensuring 99% system reliability through proactive monitoring and quick issue resolution.

Midaya Packaging Industries (Pvt) Ltd

- Delivered system customizations with strong data validation and customer-specific reports, ensuring 100% alignment with customer requirements.

Anunine Holdings (Pvt) Ltd

- Successfully executed Generic Inquiries, implemented field-level validation, and delivered parameterized reporting screens, improving system performance, data accuracy, and business reporting efficiency.

Access Engineering PLC

- Improved system performance by key customizations and optimizing Generic Inquiries for efficient data retrieval, and developing analytical reports.

Undergraduate Project

MotionMate – Final Year Project

- Achieved high real-time accuracy by developing MotionMate, a live motion tracking system for physiotherapy exercises using a hybrid LRCN (CNN + LSTM) model.
- Integrated Flask, TensorFlow, and OpenCV for live video analysis, sequential frame processing, and real-time pose correction.
- Built an interactive web interface with HTML, CSS, and JavaScript to provide instant visual feedback and enhanced user engagement.

Applied Tech Stacks: Python | TensorFlow | Keras | OpenCV | NumPy | Matplotlib | Flask | LRCN | CNN | LSTM | HTML5 | CSS3 | JavaScript | RESTful APIs
